PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience engineering high-scale, reliable web applications. Proficient across the JavaScript/TypeScript ecosystem with React, Next.js, Node.js, and Python backend services. Dedicated to writing clean, modular code, improving test coverage to >90%, and optimizing frontend rendering performance.

TECHNICAL SKILLS

- Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Redux, Webpack
- Backend & APIs: Node.js, Express, Python, FastAPI, REST API, GraphQL, Microservices
- Databases: PostgreSQL, MongoDB, Redis, MySQL
- Cloud & Tools: AWS (EC2, S3), Docker, Git, GitHub Actions, CI/CD, Jest, Cypress, Linux
- Methodologies: Agile, Scrum, TDD, Peer Reviews

WORK EXPERIENCE

Senior Full Stack Engineer | CloudScale Tech | Seattle, WA

2021 - Present

- Architected enterprise SaaS dashboard using React, TypeScript, and Tailwind CSS, improving page load speeds by 45% (LCP reduced to 1.1s).
- Designed and maintained scalable RESTful microservices in Node.js and FastAPI handling 15,000+ requests/minute.
- Integrated PostgreSQL with Redis caching layer, decreasing database query latency by 60%.
- Established automated end-to-end testing with Cypress and GitHub Actions CI/CD pipelines.

Full Stack Developer | Nexa Digital Solutions | Portland, OR

2019 - 2021

- Developed interactive web features using React, Redux, and Express.js for e-commerce clients.
- Implemented secure JWT authentication and role-based access control (RBAC).
- Reduced bundle size by 30% via code splitting and lazy loading techniques.

EDUCATION

Bachelor of Science in Computer Science

University of Washington | 2015 - 2019

KEY PROJECTS

- Real-time Collaboration Whiteboard: Built with React, WebSockets, Canvas API, and Node.js backend.
- E-Commerce Microservices Platform: Architected with Next.js, Stripe API, Docker, and PostgreSQL.
